INTRODUCING NEW

E»Flex

ECONOMICAL

Round Tread

Cushion Tread Wheels

Introducing the new round tread Jarvis "E-Flex" wheel. Like the flat tread version, it is the result of the latest advances in **cost effective** thermoplastic molding techniques and engineering – made in the USA.

This new wheel has been torture-tested against the leading competitive wheels and has passed or exceeded these tests in performance and durability. And, because it is made in the US, we can offer shorter lead times for high volume requirements.

Check out these additional performance features:

- ▶ Round tread design swivels easily and absorbs shock to protect floors, equipment and cargo
- ▶ Resistant to flat spotting under load
- ▶ Quiet operation
- ▶ Maximum corrosion & rust resistance for exposure to frequent wash down applications
- ▶ Resilient tread material rejects floor debris such as metal shavings, metal chips and sand
- ▶ Combines the rolling and swiveling ease of a hard tread wheel with the smooth, quiet ride of a soft tread wheel

Specifications

Wheel Dia.	Tread Width	Capacity (lbs.)	Model Number	Wheel Bore	Hub Length	Appox Wt.
6"	2"	450	6-220GDLM	1-3/16"	2-3/16"	1-3/4

Round Tread Technical Data

Construction: Thermoplastic Elastomer round tread permanently bonded to ribbed polyolefin wheel core

Durometer: 65 (± 5) Shore A scale

Temperature Range: -45° to +180° F intermittent service - (+120° continuous service)

Load Capacity: 450 pounds per wheel

Bearing Acceptability: Roller, Delrin or Ball Bearing (or less bearing)
