Cushion Tread Wheels

Announcing a new, high performance cushion tread wheel – Made in the USA. The new Jarvis “E-Flex” wheel is the result of the latest advances in **cost effective** thermoplastic molding techniques and engineering.

The wheel has been torture-tested against the leading “brand name” TPE wheels (thermoplastic elastomer) and has passed or exceeded these tests in performance and durability. And, because it is made domestically, we can offer shorter lead times for high volume requirements.

Check out these additional performance features:

- ▶ Cushion tread absorbs shock to protect floors, equipment and cargo
- ▶ Resistant to flat spotting under load over time
- ▶ Quiet operation
- ▶ Corrosion & rust resistant thermoplastics for exposure to frequent wash down applications
- ▶ Resilient tread material rejects floor debris such as metal shavings, metal chips, sand and small pebbles
- ▶ Combines the rolling and swiveling ease of a hard tread wheel with the smooth, quiet ride of a soft tread wheel

Specifications

Wheel Dia.	Tread Width	Capacity (lbs.)	Model Number	Wheel Bore	Hub Length	Approx Wt.
6"	2"	600	6-220GFLM	1-3/16"	2-3/16"	1-3/4

Technical Data

Construction: Thermoplastic Elastomer flat tread permanently bonded to ribbed polyolefin wheel core

Durometer: 65 (± 5) Shore A scale

Temperature Range: -45° to +180° F intermittent service - (+120° continuous service)

Load Capacity: 600 pounds per wheel

Bearing Acceptability: standard roller or Delrin bearings
